Quiz 5

Name: Answer
SSN: xxx-xx-

Instructions: There are totally 2 problems. You must show all of your work to receive a credit for a correct answer. No calculator is allowed in the quiz.

Problem 1. (5 points) Let $\mathbf{r}(t) = \langle 5t, 2\sin t, 2\cos t \rangle$. Find the curvature of the curve using the formula $\kappa = \frac{|\mathbf{r}'(t) \times \mathbf{r}''(t)|}{|\mathbf{r}'(t)|^3}$.

$$\mathbf{r}'(t) = \langle 5, 2\cos t, -2\sin t \rangle \Rightarrow |\mathbf{r}'(t)| = \sqrt{5^2 + (2\cos t)^2 + (-2\sin t)^2} \\ = \sqrt{25 + 4(\cos^2 t + \sin^2 t)} = \sqrt{29}$$

$$\mathbf{r}''(t) = \langle 0, -2\sin t, -2\cos t \rangle$$

$$\mathbf{r}'(t) \times \mathbf{r}''(t) = \begin{vmatrix} \mathbf{i} & \mathbf{j} & \mathbf{k} \\ 5 & 2\cos t & -2\sin t \\ 0 & -2\sin t & -2\cos t \end{vmatrix} = (-4\cos^2 t - 4\sin^2 t)\mathbf{i} - (-10\cos t)\mathbf{j} + (-10\sin t)\mathbf{k} \\ = -4\mathbf{i} + 10\cos t\mathbf{j} - 10\sin t\mathbf{k}$$

$$\Rightarrow |\mathbf{r}'(t) \times \mathbf{r}''(t)| = \sqrt{(-4)^2 + (10\cos t)^2 + (-10\sin t)^2} = \sqrt{16 + 100} = \sqrt{116} = 2\sqrt{29}$$

$$\text{Thus } \kappa = \frac{|\mathbf{r}'(t) \times \mathbf{r}''(t)|}{|\mathbf{r}'(t)|^3} = \frac{2\sqrt{29}}{29^{3/2}} = \frac{2}{29}$$

Problem 2. (5 points) Find the velocity vector $\mathbf{v}(t)$ and the position vectors $\mathbf{r}(t)$ of a particle that has $\mathbf{a}(t) = \langle 1, 0, 2 \rangle$, $\mathbf{v}(0) = \langle 0, 0, 1 \rangle$ and $\mathbf{r}(0) = \langle 1, 0, 0 \rangle$.

$$\mathbf{v}(t) = \int \mathbf{a}(t) dt \\ = \int \langle 1, 0, 2 \rangle dt = \langle t, 0, 2t \rangle + \mathbf{C}_1$$

$$\mathbf{v}(0) = \langle 0, 0, 1 \rangle \Rightarrow \langle 0, 0, 0 \rangle + \mathbf{C}_1 = \langle 0, 0, 1 \rangle \Rightarrow \mathbf{C}_1 = \langle 0, 0, 1 \rangle$$

$$\Rightarrow \mathbf{v}(t) = \langle t, 0, 2t \rangle + \langle 0, 0, 1 \rangle$$

$$= \langle t, 0, 2t + 1 \rangle$$

$$\mathbf{r}(t) = \int \mathbf{v}(t) dt = \int \langle t, 0, 2t + 1 \rangle dt = \langle \frac{t^2}{2}, 0, t^2 + t \rangle + \mathbf{C}_2$$

$$\mathbf{r}(0) = \langle 1, 0, 0 \rangle \Rightarrow \langle 0, 0, 0 \rangle + \mathbf{C}_2 = \langle 1, 0, 0 \rangle \Rightarrow \mathbf{C}_2 = \langle 1, 0, 0 \rangle$$

$$\text{Thus } \mathbf{r}(t) = \langle \frac{t^2}{2}, 0, t^2 + t \rangle + \langle 1, 0, 0 \rangle$$

$$= \langle \frac{t^2}{2} + 1, 0, t^2 + t \rangle$$
